+

Specific conditions	
<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of around <b>EUR 8.00 million</b> would allow these outcomes addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative <b>budget for the topic is EUR 16.00 million.</b>
<i>Type of Action</i>	<b>Innovation Actions</b> → <b>typ aktivít v projekte</b>
<i>Eligibility conditions</i>	The conditions are described in General Annex B. The following exceptions apply:  If projects use satellite-based earth observation, positioning, navigation and/or related timing data and services, beneficiaries must make use of <b>Copernicus and/or Galileo/EGNOS</b> (other data and services may additionally be used).
<i>Technology Readiness Level</i>	Activities are expected to achieve <b>TRL 6-8 by the end of the project</b> – see General Annex B.
<i>Legal and financial set-up of the Grant Agreements</i>	The rules are described in General Annex G. The following exceptions apply:  <b>Eligible costs will take the form of a lump sum</b> as defined in the Decision of 7 July 2021 authorising the use of lump sum contributions under the Horizon Europe Programme – the Framework Programme for Research and Innovation (2021-2027) – and in actions under the Research and

→ ID témy + názov témy

→ špecifické podmienky

→ TRL - úroveň pripravenosti technológie

→ LUMP SUM - paušálne financovanie

# Prečo je dôležitá informácia o type projektov (Type of Action)

## *Výskumné a inovačné opatrenia/Research and innovation actions (RIA)*

100% financovanie priamych oprávnených nákladov projektov riešiacich riadne vymedzené problémy, ktoré môžu viesť k vývoju nových poznatkov alebo novej technológie. Projektové aktivity v rámci výskumných a inovačných opatrení môžu zahŕňať základný alebo aplikovaný výskum, vývoj technológie a jej integráciu, testovanie a validáciu v malom rozsahu v laboratóriu alebo simulovanom prostredí.

## *Inovačné opatrenia/Innovation actions (IA)*

70% financovanie priamych oprávnených nákladov pre ziskové subjekty, pre neziskové subjekty ako univerzity a podobne ostáva sadzba 100%. Financovanie sa zameriava viac na činnosti súvisiace s trhom, ako tvorbu prototypov, skúšanie, predvádzanie, úvodnú prevádzku, zhodnotenie a podobne, ak je ich zámerom vyprodukovať nových alebo lepších produktov a služieb. Financovanie tiež zahŕňa činnosti ako pilotné a demonštračné aktivity novej alebo vylepšenej technológie alebo trhovú replikáciu inovácií.

## *Opatrenia v oblasti koordinácie a podpory/Coordination and support actions (CSA)*

100% financovanie oprávnených priamych nákladov sa vzťahuje na koordináciu a prepojenie výskumných a inovačných projektov, programov a politík do sietí. V rámci koordinačných a podporných opatrení budú financované činnosti ako koordinácie podporných služieb, zvyšovanie povedomia, diseminácia, šandardizácia, politické dialógy a štúdie.

## Typy akcií / projektov:

- očakávaný rozsah aktivít vykonávaných v rámci projektu
- stupeň pripravenosti technológie TRL
- miera spolufinancovania
- zloženie konzorcia – kritérium oprávnenosti – koľko partnerov, z akých krajín.

Viac informácií o typoch projektov: [wp-13-general-annexes\\_horizon-2023-2024\\_en.pdf \(europa.eu\)](https://ec.europa.eu/easip/wp-content/uploads/2023/02/wp-13-general-annexes_horizon-2023-2024_en.pdf)

# Očekávané výstupy v textu témy

Expected Outcome: Project results are expected to contribute to all of the following expected outcomes:

- Streamlining resource-efficient nearly zero-energy performance renovation processes.
- Renovations with reduction of at least 30 % waste, 25% cost, and 30% work time (to 1-2 days per dwelling/building unit), compared to current deep renovation processes.
- Reduced energy performance gap between as-built and as-designed (difference between theoretical and measured performance), and higher construction quality.
- Innovative, tailored business models for deep renovation, generating economies of scale and contributing to an increased rate of renovation.
- Improved comfort, Indoor Air Quality and Indoor Environmental Quality.

# Rozsah projektových aktivít v texte témy

Scope: In line with the Renovation Wave and in order to meet long-term climate and energy targets, more action is needed to increase the rate and depth of building renovation. Several recent projects and calls have focused on prefabrication for deep renovation, but more work is needed to develop innovative, seamless workflows from design to off-site prefabrication, to installation, construction on-site, maintenance and future dismantling, reuse and recycling of prefabricated elements, duly considering life cycle performance, sustainability, and the potential to use the buildings as carbon sinks.

súlady aktivít projektu s Európskou VLNOU OBNOVY Renovation Wave

projekt prispieva k dosiahnutiu dlhodobých klimatických a energetických cieľov

Cieľ projektu: zvýšiť mieru obnovy budov a zabezpečiť, aby renovácie viedli k vyššej energetickej hospodárnosti

Aktivity: vytvorenie inovatívnych pracovných postupov

Proposals are expected to address all of the following:

- Investigate innovative approaches for industrialised deep circular renovation, covering the whole workflow from design through to off-site prefabrication, installation, construction on-site and strategies for maintenance, operation and end of life.
- Ensure the proposed approaches aim to achieve the highest level of energy performance (at least NZEB level) with a view toward zero-emission buildings, ensuring a high level of indoor environment quality, keeping costs in an attractive range for owners and investors.
- Make use of innovative processes and technologies, including those delivered by previous research, such as design based on circularity principles, prefabricated components, and digital tools that allow to optimise workflows (cost, time, quality, resource use).
- Demonstrate a seamless integration of the proposed approaches with state-of-the-art digital technologies for construction and renovation (Building Information Modelling, Digital Twins, etc.).
- Select processes and technologies that can be easily tailored to give a maximum potential for rapid and broad deployment at European level.
- Investigate innovative business models (e.g. as-a-service models), accounting for potential market and regulatory barriers, in view of mass deployment and Europe-wide impact.
- Apply the proposed workflows to at least three demonstrations to assess the proposed approaches for different buildings typologies representative of the European building stock, ensuring the most adequate coverage of the respective climatic conditions. The demonstrations can be either single buildings or clusters of buildings, and at least one of the demonstrations has to address residential buildings.

**Výskumné aktivity zamerané na inovatívne prístupy k priemyselnej hĺbkovej obnove budov**

**Aktivity zamerané na výber najvhodnejších prístupov pri hĺbkovej obnove budov (parametre sú tu uvedené)**

**Výber najvhodnejších technológií a procesov, čomu bude predchádzať ich prieskum a analýza**

**Demonštrovať integráciu navrhovaných postupov za pomoci dostupných digitálnych technológií pre výstavbu a rekonštrukciu (Digitálne modely stavby)**

**Vypracovanie nových inovatívnych biznis modelov**

**Demonštračné aktivity v min. 3 rôznych typoch budov ( 1 demo v rezidenčných budovách)**

# Klíčové slová v texte témy

# Odporúčania na politiky, strategické dokumenty v texte témy

Proposals should address issues in line with the European Democracy Action Plan or EU policy initiatives that emanated from this Action Plan.

- Developed solutions are close to nature, are at least neutral or support biodiversity, improve or at least do not harm water quality and availability (retentiveness in the landscape), making the agriculture/forestry sector and nature at large more resilient to climate change and supporting implementation of the **EU Biodiversity Strategy for 2030**.

Supporting the **Zero Pollution Action Plan** and its monitoring strategy by:

## Odporúčania na iniciatívy v texte témy

Projects are expected to contribute to the New European Bauhaus (NEB) initiative<sup>160</sup> by interacting with the NEB Community, NEBLab and other relevant actions of the NEB initiative through sharing information, best practice, and, where relevant, results.

Several levels of interactions are foreseen with other European initiatives, in particular with the Industrial Battery Value Chain (BATT4EU) partnership, the Cooperative Connected and Automated Mobility (CCAM) partnership and the Mission on Climate Neutral and Smart Cities, in particular:

- All software developed should be open source, licensed under a CC0 public domain dedication or under an open source license as recommended by the Free Software Foundation<sup>43</sup> and the Open Source Initiative<sup>44</sup>.
- The ECCCH will be open and inclusive, both in terms of the users of the platform and the connections to other related initiatives/platforms such as the Data Space.

## Skratky, publikácie, web stránky v texte témy

- Develop and test methodologies that combine and integrate CSS and other Social Sciences and Humanities (SSH) methods to study democratic governance, overcoming

Concrete efforts should be made to ensure that the data produced in the context of the funded projects is FAIR (Findable, Accessible, Interoperable and Re-usable), particularly in the

**Responsible Research and Innovation (RRI)** should be organised in order to inform the analysis mentioned above.

<sup>38</sup> The New European Bauhaus initiative was launched by European Commission President von der Leyen in her State of the European Union speech autumn 2020. More information here: [https://europa.eu/new-european-bauhaus/index\\_en](https://europa.eu/new-european-bauhaus/index_en)

<sup>39</sup> Recommendation (EU) 2021/1970 of 10 Nov 2021 on a common European Data Space for Cultural Heritage.

## Odkazy na rozpočet projektu v texte témy

The funding rate is 60% of the eligible costs, except for non-profit legal entities where the funding rate is up to 100% of the total eligible costs.

The selected projects are expected to contribute to the BRIDGE initiative<sup>111</sup>, actively participate to its activities and allocate up to 2% of their budgets to that end. Additional contributions to the 'Alliance for Internet of Things Innovation' (AIOTI) and other relevant activities (e.g. clusters of digital projects and coordinating actions) might be considered, when relevant.

## Odkazy na podporu tretích strán v texte témy

Financial Support to Third Parties: Projects should use FSTP to stimulate the engagement of SMEs in the delivery of high quality, robust, sharable modules for use in human robot interaction in service and industrial tasks. Minimum 50% of the EU funding requested by the proposal should be allocated to the purpose of financial support to third parties.

Beneficiaries may provide financial support to third parties. The support to third parties can only be provided in the form of grants. The maximum amount to be granted to each third party is EUR 50 000.

As third parties' grants may include robotics components, requiring high equipment investment and/or important effort to integrate in a use-case to address robotics challenges, the maximum amount to be granted to each third party is EUR 200 000.

# Referencie na iné projekty v texte témy

Projects are expected to collaborate and contribute to the activities of the Coordination and Support Action defined under the topic HORIZON-CL5-2022-D2-01-08, including the definition of a long-term research roadmap for this topic.

Actions should build upon and cooperate with relevant Horizon funded projects (e.g., Arctic PASSION, OceanIce, PolarRES, CRiceS, iCUPE), the EU Polar Cluster, the Copernicus Climate Change Service, the Copernicus Marine Environment Monitoring Service, the Copernicus Land Monitoring Service and the GEO initiative.

Proposals are expected to establish links with projects funded under the following topic: HORIZON-CL5-2022-D3-01-10 - Interoperable solutions for flexibility services using distributed energy storage.

Proposals are encouraged to seek synergies and collaboration whenever possible with relevant projects selected under previous EU-funded calls.<sup>18</sup> Clustering and cooperation with other selected projects under this topic and other relevant projects are strongly encouraged.

<sup>18</sup> For instance under the topic HORIZON-CL2-2022-DEMOCRACY-01-05: Evolution of political extremism and its influence on contemporary social and political dialogue, and the JRC initiative for Meaningful and Ethical Communication (Enlightenment 2.0, [https://knowledge4policy.ec.europa.eu/evidence-informed-policy-making/topic/enlightenment-20\\_en](https://knowledge4policy.ec.europa.eu/evidence-informed-policy-making/topic/enlightenment-20_en)).

Projects are required to utilize the data exchange infrastructure that is being developed under ongoing EU-funded under Horizon 2020, Horizon Europe and the Digital Europe Program.

The project is required take into account, and collaborate with, where considered necessary, existing Living Labs (e.g. EnergyVille, TomorrowLab and living labs funded entirely by EU projects as study or demonstration site) to test integrated consumer services the ongoing

# Odporúčania na medzinárodnú spoluprácu v texte témy

Proposals are strongly encouraged to involve stakeholders, including non-state actors and citizens, from the countries in the topic scope. The consortium must include at least one entity from the following countries: Georgia, Republic of Moldova or Ukraine. Legal entities from these countries must take part in the project as beneficiaries.

International cooperation with USA, Australia, Africa or India is encouraged.

In order to achieve the expected outcomes, international cooperation is encouraged, in particular with Japan and the United States but also with other relevant strategic partners in third countries.

1. Consortia must also include as associated partners at least three independent legal entities established in China.
2. Legal entities established in China can only participate as associated partners; and
3. Chinese participants must be awarded co-funding by MOST \*.

Legal entities established in Algeria, Azerbaijan, Egypt, Jordan, Lebanon, Libya, Morocco, Palestine<sup>34</sup> and Syria may exceptionally participate in this Coordination and Support Action as a beneficiary (or affiliated entity).

# Odporúčania na projektových partnerov v texte témy

Proposals are also **encouraged to collaborate with the JRC Competence Centre** on Participatory and Deliberative Democracy,<sup>36</sup> particularly with respect to actions and initiatives

The Joint Research Centre (JRC) may participate consortium selected for funding.

- Regarding the development of the renewable energy technologies value chains, fostering the participation of the **local industry** and other stakeholders, including **citizens**, **Energy Communities** and the **Energy Communities Repository**<sup>159</sup> as appropriate, therefore generating local jobs, skills, economic growth and benefits for citizens. As such, providing support to the **participation of citizens** in the design, implementation and exploitation of renewable energy, in order to increase acceptability. Where applicable, **synergies with other economic sectors than the energy sector** may be considered.

- **Akademický sektor**
- **Verejný sektor**
- **Občianska spoločnosť**
- **NGO**

Projects should collaborate with the **Clean Hydrogen Joint Undertaking** on aspects that require integration of hydrogen and are expected to contribute and participate to the activities of the TRUST database and the hydrogen observatory.

## Odporúčania na „stakeholders“ v texte témy

including related technical aspects (e.g. gamification, artificial intelligence). The involvement of different stakeholders, including public administrations, end-users, political actors and the private sector is strongly encouraged to foster dialogue and understanding between diverse interest groups in democratic deliberations, enhance the legal frameworks and safeguards

- Demonstrate HESS usage in at least three different use cases in collaboration with relevant stakeholders (e.g., DSO, EV charging infrastructure owners) and its integration in standard grid architectures (Smart Grids Architecture Model – SGAM) ensuring

Based on lessons learnt from existing good practice cases and experiences, proposals should consider the citizens' perspectives in building digital democracy tools and processes,

## Výnimky a špeciálne podmienky v texte témy

*Exceptional page limits to proposals/applications*

The page limit of the application is 70 pages.

*Procedure*

The procedure is described in General Annex F. The following exceptions apply:

This topic is part of the **blind evaluation pilot** under which first stage proposals will be evaluated blindly.

*Admissibility conditions*

The conditions are described in General Annex A. The following exceptions apply:

**Applicants submitting a proposal under the blind evaluation pilot** (see General Annex F) must not disclose their organisation names, acronyms, logos, nor names of personnel in Part B of their first stage application (see General Annex E).

# Etické aspekty v textu témy

- Social and economic resilience and sustainability are strengthened through a better understanding of the **social, ethical, political and economic impacts** of drivers of change (such as technology, globalisation, demographics, mobility and migration) and their interplay.

change. However, digital solutions are also more **vulnerable to disruption e.g. cybersecurity and privacy threats, misinformation campaigns or digital lobbying, attempting to impact public decision-making, including political election outcomes, and is likely to bring important ethical challenges concerning digital education and digital literacy, access to information, built-in bias, etc.**

Research should investigate how remote working arrangements can affect different spaces, focusing on the urban and rural divide and its impacts on the local communities, including on **ethical and social aspects**, employment, as well as on administration and infrastructures.

- On the basis of lessons from successful deployment, analysis of the implementation of **the ethics principles for trustworthy AI.**

impact on human agency and autonomy. Many **ethical issues arise in the development of AI systems**, such as their use in medical devices, brain-computer interfaces, reasoning about human mental and emotion state, etc.<sup>119</sup>

- Based on this, proposals for development and deployment of AI, should ensure a broad support and appropriate involvement of other relevant AI initiatives, taking into account guiding **ethics principles and the current development of the AI Act.**

# Odporúčania a tipy na záver

Expected Outcome: Projects should contribute to all of the following expected outcomes:

- Further increase the visibility of and access to European arts and culture internationally.
- Develop and test pilot solutions based on a model that will allow cooperation between local, national and European level and establish strategic alliances between art and cultural sectors and with other sectors.

## Matching table / Porovnávacia tabuľka - príklad

Expected Outcome: Projects should contribute **to all of** the following expected outcomes:

- Further increase the visibility of and access to European arts and culture internationally	- Zvyšovanie viditeľnosti a prístupu k európskemu umeniu a kultúry na medzinárodnej úrovni
- Develop and test pilot solutions based on a model that will allow cooperation between local, national and European level and establish strategic alliances between art and cultural sectors and with other sectors.	- Rozvíjať a testovať pilotné riešenia na základe modelu, ktorý umožní spoluprácu medzi miestnou, národnou a európskou úrovňou a vytvorenie strategických aliancií medzi umením a kultúrными sektormi a s inými sektormi
