

UNIVERSITÀ DEGLI STUDI MAGNA GRAECIA DI CATANZARO  
DIPARTIMENTO DI GIURISPRUDENZA, ECONOMIA E SOCIOLOGIA

The University of Magna Graecia of Catanzaro expresses its availability to participate in Consortia on Horizon projects in relation to the legal challenges of new technologies and specifically on the following aspects:

- **Legal Profiles**, such as the protection of personal data (GDPR), contracts and responsibility and liability in the use of technologies and the Common European Data Spaces.
- **Ethical Profiles**, concerning technological governance and the social impact of technologies and fundamental rights on the use of artificial intelligence systems and algorithms.
- **Regulatory Profiles**, such as compliance with national and European regulations on innovation, analysis and interpretation of emerging legislation on technologies, strategies for managing legal and regulatory risks in innovation.

•  
This collaboration can be develop, for example, through:

- research and scientific in-depth study activities;
- project support;
- provision of specific training courses.

Due to the transversal nature of our skills, the contribution could be expressed in reference to several clusters, especially 2-3- 4, and different topics, both RIA and CSA, including for example:
