Pracovní program 2026 – 2027

Horizon Europe - Work Programme 2026-2027 Research Infrastructures

preparatory action exploring a more integrated and sustainable scheme for access to research infrastructures HORIZON-INFRA-2025-01-DEV-05²³, and the actions supported under topics HORIZON-INFRA-2027-01-SERV-01 and HORIZON-INFRA-2027-01-SERV-02. This collaboration should ensure a common front page to all above actions highlighting the common objectives of EU supported access, the main conditions and requirements, providing preliminary guidance on access opportunities and directing to the single-entry point portal of each pilot of HORIZON-INFRA-2027-SERV-01-01. The collaboration should also promote simplified access pathways, good practices on call conditions, converging access modalities and selection process, and effective governance of the set of projects acting as an access programme with appropriate advisory bodies.

Proposals could consider the inclusion of the European Commission's Joint Research Centre (JRC) research infrastructures in the area of health and food. In that respect, the JRC will consider collaborating with any successful proposal and this collaboration, when relevant, should be established after the proposal is approved.

HORIZON-INFRA-2026-DEV-01-03: Consolidation of the research infrastructure landscape – individual support for evolution, long-term sustainability and emerging needs of pan-European research infrastructures

Call: Research Infrastructures 2026

Specific conditions

Expected EU contribution per project

The Commission estimates that an EU contribution of between EUR 3.00 and 4.50 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.

Indicative budget

The total indicative budget for the topic is EUR 9.90 million.

Type of Action

Research and Innovation Actions

Eligibility conditions

The conditions are described in General Annex B. The following exceptions apply:

The following additional eligibility criteria apply:

Due to the scope of this topic, proposals must include at least one of the ESFRI Landmarks²⁴ or European Research Infrastructure Consortia (ERICs)²⁵ as beneficiary. Such beneficiaries, and the research infrastructure(s) that they operate, must be explicitly identified in the

²³ https://cordis.europa.eu/programme/id/HORIZON_HORIZON-INFRA-2025-01-DEV-05

²⁴ See the list of ESFRI 'Landmarks' in the 2021 ESFRI Roadmap on <https://roadmap2021.esfri.eu/>. For ESFRI Landmarks that are not an ERIC or an international European research organisation, the beneficiary must be the legal entity hosting the infrastructure in the lead country (such legal entity is a minimum requirement to become an ESFRI Landmark).

proposal. For distributed ERIC the ERIC must be the beneficiary.

The rules are described in General Annex G. The following exceptions apply:

Eligible costs will take the form of a lump sum as defined in the Decision of 7 July 2021 authorising the use of lump sum contributions under the Horizon Europe Programme – the Framework Programme for Research and Innovation (2021-2027) – and in actions under the Research and Training Programme of the European Atomic Energy Community (2021-2025)²⁶.

The funding rate is 80% of the eligible costs.

Expected Outcome: Project results are expected to contribute to several of the following expected outcomes:

- better structured and strengthened European research infrastructure landscape;
- new services available to a wider user community, including participants in other parts of Horizon Europe, allowing to better tackle scientific and societal challenges;
- increased capacity to address EU policy priorities and/or socio-economic challenges;
- reinforced global competitiveness of the European Research Area;
- reduction of environmental (including climate-related) impacts as well as optimisation of resource and energy consumption integrated through the full life cycle of research infrastructures;
- increased long-term sustainability of European research infrastructures.

Scope: This topic targets the consolidation of the EU research infrastructures landscape through the support, together with the countries that are members of the research infrastructures, to the strengthening, long-term sustainability, reorientation or evolution of ESFRI Landmarks²⁷ or European Research Infrastructure Consortia (ERICs)²⁸.

The list hereunder includes all the on-going projects funded under Horizon 2020 and the Horizon Europe RI to open their research infrastructures to transnational/virtual researchers/users. These are the projects funded under the Integrating Activities part of the RI Work programme, some of the ESFRI projects (if access is granted to all researchers no matter if their country is member of the ESFRI RI) and some e-infrastructures (provided services are addressed to researchers and not to RIs or other e-infra).

For each project, a short description of the transnational/virtual activities is given as well as the deadline to submit a proposal to open call and a link to the project website and the TA&VA access webpage. The projects can be filtered by scientific domain and type of access (transnational or virtual).
