

VILOGIA S.A - Administrative form

PIC: 950671490

Postcode: 59650

Legal name: VILOGIA S.A

Street: Rue Jean Jaures 74

Address:

Country: France

Town: VILLENEUVE D'ASCQ

Webpage: www.vilogia.fr

Main contact person:

Ms. Daniela GALARZA-RIOS

European Project Manager

Mail: daniela.galarzarios@vilogia.fr

Phone: +33(0)672651022

VILOGIA's main roles in previous HORIZON projects:

- Communication, dissemination and engagement
- Prototyping and demonstration
- Education and training

About VILOGIA

As a major national social housing provider with substantial experience in several HORIZON-funded projects, VILOGIA is actively seeking new opportunities for European collaboration.

We regularly join European consortia as a pilot-site partner, enabling the testing and evaluation of innovative solutions in social housing, ecological transitions, and urban development. Our key areas of interest include (but do not limit to):

- circular-economy approaches applied to buildings and urban environments,
- sustainable construction and renovation,
- water management in residential settings,
- the use of artificial intelligence for asset and portfolio management.

Through our involvement in these areas, our objective is to build on project outcomes, enhance our operational practices, strengthen our internal strategies (energy performance, technical management, service quality), and share our insights with the wider French social housing community.

Relevant previous projects or activities

Name of the project or activity	Short description
<i>H2020-CULTURAL-E</i>	<i>The Cultural-E goal was going a step beyond Nearly Zero Energy Buildings (nZEBs) towards the future of Plus Energy Buildings (PEBs). Cultural-E tried to establish guidelines for designing PEBs in Europe taking into account socio-cultural and climatic differences in order to enable a comprehensive optimisation of value/cost ratio of PEBs.</i>
<i>H2020-INFINITE</i>	<i>Development of all-in-one industrialised envelope technologies that will allow to increase the energy performance and lifespan of a building, while cutting time and costs of the retrofiting process.</i>
<i>Interreg NEW E=0</i>	<i>Desirable, warm, affordable homes for life. EnergieSprong Project, finished in 2019.</i>
<i>Interreg NWE MustBe0</i>	<i>Affordable, desirable, long-term performance guaranteed net zero energy (NZE) retrofits for apartment buildings in North West Europe, started in January 2019, ended on 2023.</i>
<i>Interreg FWV VIVONS LOW-TECH LEVEN</i>	<i>The project integrates both the technical and social aspects of low-tech solutions. These are designed to complement high-tech solutions and are based on the principle of reusing existing resources rather than replacing them. Vilogia S.A. will implement architectural solutions during a participatory and educational renovation project, enabling tenants to experiment with low-tech renovation and equipments.</i>
