1) PROJECT INFORMATION

Field of expertise related to the topic: Our institution has wide experience in science education activities. Since 2003 we are leading the Scientific Steering Committee in the Certamen Jóvenes Investigadores, the first national contest for young researchers conceived to foster interest in scientific research where most of the projects assume real-life challenges. We are also running other

activities in this domain coordinated by the Scientific Culture Department. In addition, every year we take part in several programmes to bring science into schools and engage citizens in research and innovation process. Related to this, many Research Groups working in UNED are currently involved in citizen science related activities, in areas such as palaeontology, neuroscience, archaeology or sustainability among others.

Potential contribution to the project: With more than 60 associated centres distributed all over the country and other 15 abroad, we are ready to cover a vast area compared to other institutions. For this reason, we are able to reach many cities but also small villages where science initiatives usually takes longer to arrive. In addition, more than 200.000 students in UNED represents the opportunity of a huge community interested in science and technology. Finally, our rigor and commitment is our best contribution, as well as the accumulated experience as partners in other european projects.

Role in the project:

Short profile of the Organisation: The National University of Distance Education, known in Spanish

as Universidad Nacional de Educación a Distancia (UNED), is a distance learning and research university founded in 1972 and is the only university run by the central government of Spain. It has headquarters in Madrid, Spain, with campuses in all Spanish autonomous communities. In addition, there are 14 study centres, and 3 exam points, in 13 countries in Europe, Americas and Africa. The University awards undergraduate and postgraduate degrees, as well as non-degree qualifications such as diplomas and certificates, or continuing education units. UNED combines traditional onsite education with distance learning programs. With over 260,000 students, UNED is the largest university in Spain and the second largest in Europe.
