Description of the (Research) Team

Our Research Group on Development of Intelligent Environments is specialized on deploying sensing equipment and creating software to provide services which help humans in practical situations. Our areas of higher interest and expertise is on the use of technology to improve: health and well-being (e.g., through the concept of Smart Homes and mobile apps), to improve education (e.g., through the concepts of Smart Classrooms and Smart Campus) and services for citizens at work and other dimensions of daily life (e.g., through the concept of Smart Meetings and Smart Cities). We also host the Smart Spaces Lab in our campus which includes a fully functional Smart Home.

Expertise of the Team Leader

All my expertise is in Computer Science, however since two decades ago I made the conscious choice of working on solutions and scientific exploration which have direct societal impact.
