Your enterprise is an SME if:

- it is engaged in **economic activity**
- it has **less than 250 employees**
- it has either an **annual turnover not exceeding €50M, or an balance sheet total not exceeding €43M**
- it is **autonomous**

For the definition of SMEs, look at: http://ec.europa.eu/growth/smes/business-friendly-environment/sme-definition_en

Short introduction of key areas of institute's research:

The activities in the **health sector** of the Urological clinic range from outpatient ones with urinary stones, oncological and functional ones, to **robotic** ones with nephrectomy, cystectomy and radical prostatectomy. We also **support the global register with the data of people operated** for prostate cancer and with those deriving from follow-up activities.

Expertise / Commitment offered

Description of your expertise:

The Department of Neuroscience and Reproductive and Odontostomatological Sciences of the University of Naples "Federico II" proposes itself as a partner for the Mission: HORIZON 2021-CANCER-02-02. The Department of Neuroscience and Reproductive and Odontostomatological Sciences belongs to the Urological Clinic of the Federico II University of Naples - Campania excellence of the Polyclinic whose Director is Prof. Vincenzo Mirone - Director of the Urology residency programme as well. Thanks to our Urological Center, the Department has the possibility to have access to all the clinical data that are generated by the clinical-surgical activity of the hospitals belonging to the specialization school of Urology. We are talking about some of the most important hospitals in the south in terms of size and number of cancer patients treated: Cardarelli of Naples, the Hospital of the Sea, the Luigi Vanvitelli University Hospital, the Federico II University Hospital of Naples, the National Cancer Institute. IRCCS G. Pascale Foundation and Moscati Hospital of Avellino.

From a numerical point of view, every year we carry out on average about 1,000 surgeries on patients with prostate cancer who have undergone radical prostatectomy, about 150 patients with advanced bladder cancer - who have undergone radical cystectomy - and 800 patients with kidney cancer who have undergone radical nephrectomy. These activities allow us to have an enormous flow of information, always new and updated on the life of patients with regard to the pre-operative and post-operative phase, thanks to their continuous follow-up. Our experience has given us the opportunity to be chosen by the Movember Foundation, the world's largest prostate cancer prevention organization to support and integrate the existing global databases (global registers), in compliance with the need for greater efficiency in the response to the treatment of the disease and to a greater understanding of all tumors of urological relevance, which are among the top 5, by incidence, among those affecting the adult male.

Keywords specifying your expertise:

Health, cancer, data collection, data evaluation and survey

Commitment offered:

Research Demonstration Training
 Technology Dissemination Other:
