

**University of Twente and Horizon Europe Cluster 5 programme:
CLIMATE SCIENCES AND RESPONSES FOR
THE TRANSFORMATION TOWARDS CLIMATE NEUTRALITY**

The University of Twente (www.utwente.nl) fuses technology, science and engineering with social sciences. The university focuses on global resilience, the digitalization of society, the improvement and personalization of healthcare, the reshaping of the world with smart materials and intelligent manufacturing.

As part of the overall Resilience@UT programme (www.utwente.nl/resilience), the sub-programme on resilience to drought and water scarcity is carried out by an interfaculty working group. **This group would like to join a consortium and contribute as a partner to the following Cluster 5 call either by leading a work package and/or supporting one or more work packages for:**

HORIZON-CL5-2023-D1-01-09:

Behavioural change and governance for systemic transformations towards climate resilience

Of particular relevance to this call on climate adaptation and transition pathways is the expertise within the Governance and Technology for Sustainability (CSTM) section of the Faculty of Behavioural, Management and Social Sciences (BMS) and that of the ITC Departments of Urban and Regional Planning and Geo-Information Management, and Water Management.

Specific areas of expertise relevant for the calls include:

- Spatial and economic aspects of behaviour
- Participatory and simulation modeling for behavioural change (and decision making)
- Nature-based solutions
- Simulation and serious gaming for governance
- Social practice approaches to integrative policy development
- Analysis/assessment of governance relationships
- Moderating and analysing change and innovation processes in European regions
- Resilience to climate change and global governance
- Governance innovations and scaling up
- Policy tools for climate adaptation, IPCC contributions

And more....

The university has extensive experience and an excellent track record working in or leading Horizon and other EU and international projects with a network of regional, national and international public and private sector partners for the themes addressed in HORIZON-CL5-2023-D1-01-09.
