Short profile of the Organisation: An engine of emancipation for several centuries, science, now techno-science, is tremendously powerful today. In order to serve the well being of the whole of humanity on our planet, this power must be driven by other motives than merely the quest for knowledge, the desire for power or the logic of profit. So after the era of the « control of nature » must come that of the « control of science », of citizen science.

The Citizen Science organisation aims at supporting and prolonging the current movement of democratic and civil appropriation of science in order to put it at the service of the common good.
